

To all the people that control the what what is important for us to listen to. I am writing this in response of what I have just learnt from my XM radio sources that it is your intention to limit and or even to silence this "XM Radio" from extending its offers to us, this is regarding traffic and weather.

Let me tell you a few things that you need to know:

I bought my XM Satellite radio and chose to pay a monthly fee of \$10.00 because I am tired of listening to the same commercial 20 times a day, and I am tired of the monotony of the whole deal.

It is sickening and repulsive to listen to the same structure of content.

In my car, from my XM Satellite, I have the liberty of choosing all I what I want without limitation, so if XM Satellite wants to make things better, and that the old FM and AM have failed why not give them a chance?

I am one of the early subscribers of XM Satellite who having seen the weakness of the the traditional radio, got fed up and went XM.

I believe you guys have nothing better to do but trying to stop a good thing. This is not about Janet Jackson shown a nipple, this is about giving us the consumer who need a quality service never mind how much and are willing to pay for it.

So if XM Satellite is trying to give us traffic and weather without bugging us with the same old annoying commercials then so be it, leave XM Satellite alone, this is not the Kremlin, this is the USA land of the FREE! XM Satllite is doing a good job, and I love it, and if you bring a good idea, a good product, I will not wait nor hesitate to jump on board and support you, PLEASE LEAVE XM SATELLITE ALONE!!
